FRIDAY JUNE 19th 1942

NUMBER 8

Hospital Plan Progressing Nicely

Our hospital program is still progressing steadily, though maybe a little slow. There are a lot of details about this that require just so much time, and can't be hurried any faster. The local Committee met with the Magrath Committee last week in a very nice meeting, and all misunderstandings about boundaries were removed, and each committee is proceeding now with a clear boundary line. In fact, Magrath now has their out lined district approved, and a vote will soon be called there.

We have received official notification from Edmonton that our proposals have been accepted and that our petitions must now be made out and signed, and when this is done and the proposed plan approved, then a vote will be called over the district to see if the majority are in favor of a Municipal Hospital. We hope that the work incidental to these petitions can be cleaned up so that our vote may be held early in July.

The need for a Hospital here does not need to be emphasized any more we are sure. The success of Municipal Hospitals is a matter of general knowledge. If there is any question on the part of one's supporting the scheme, a study of the set-up of the plan, the benefits to be derived, and the assistance that comes from the Government makes it ideal. It gives hospital facilities to rich and poor at a price that all can pay, and it makes illness and suffering so much less of a burden. Ask any person who has lived in a Hospital district. Go to any Municipal Hospital & talk with Board members, with staff or with patients and see if you can find any real complaints amongst them. The fact that eight other units are either forming or have just been organized in our own Alberta, should show the doubter that we are not sponsoring any fad that is not sound. We have the area, we have the population, we have the finance. All that remains is to get organized, get the affirmative vote and push on to the realization of our ideas and ideals. You can help by boosting in private talk, in club, in meeting and so on. A hospital minded public will be a tremendous help in the work that still remains.

Lee Gilchrist of Lethbridge was here on Provincial Government business Thursday.

The call-up age for military service has been advanced now to 35 for single men, and the next step is expected to be the calling up of men who were 21 years old and married in July 1940. Also before the house is a motion to remove the restriction against compelling men to serve outside Canada.

NEWS NOTES

The bus was nearly an hour late this morning from Cardston. It looked as if they really had some rain farther west too.

Gordon Brewerton of Cardston was a Raymond visitor Monday and was a guest at the Rotary luncheon.

Sunday was one of the nicest days of the spring, warm, quiet and really enjoyable. Quite a strong west wind blew up Monday and made the day and evening cool and disagreeable.

When Mr. and Mrs. Geo. Court arrived home Friday morning a telegram awaited them advising them of the safe arrival in England of Sgt. Roy Howland of the 6th Field Park Co.

Rain commenced falling at 2 a.m. Friday morning and rained off and on all day long. This storm found some early hay down and ready to be hauled, and most of the beets thinned. Some grain is still unseeded and summerfallow presents a real problem because of the high and heavy stand of weed growth. No rain, more rest.

LIONS CLUB MEETING

The Sugar Bowl was the usual place for the meeting of the Raymond Lions Club with 23 members and one visitor present.

The meeting opened by the singing of "Oh Canada" with prayer being offered by Lion O. H. Snow.

Lion J. McLean led the members in community singing.

Program Chairman J. Vanderbilt introduced Kelly Nemeth who is a Petty Officer in the Canadian Navy, who gave the boys an exciting talk on Convoy Versus Submarine. Kelly has been in convoy work for some time now and answered many questions fired at him by the members. In appreciation of his efforts the Club gave him the Lions Roar.

Secretary Lion D. Rolfsen read the Financial Report. It was moved by Lion P. Moreland seconded by Jack Vandenhil that the report be accepted as read.

Lion J. Strong won the War Savings Certificate for the evening.

It was decided that the Club have a float in the Parade on Dominion Day.

Pres. R. Pack thanked the members for their co-operation during his presidency, and he considered it an honor to have been President of the Raymond Lions Club.

During Pres. P. Moreland accepted the Gavel and from Pres. Pack and immediately called for a Lions Roar for Pres. Pack.

Lions R. Bator, Geo. Ralph, E. Leavitt, R. Pack, R. Fausett, and P. Moreland were appointed as official delegates to the Convention in Edmonton.

A meeting for the selecting of the different committees for the coming year was called after the closing of the regular meeting at which the following donations were made.

\$25.00 to the British Child War Victim Committee.

\$10.00 to the Business Men's Horse Race at the Stampede.

\$25.00 was set aside for the Raymond High School Scholarship.

Cheese Factory Given O.K.

This week the Cheese Factory officials got their articles of incorporation as a limited company, and also their permit from Ottawa to commence construction. This is very welcome news, and now with the clearing up of a few more details they will be already to start their sale of shares and commence construction of their factory building.

To those who have not made a study of the industry, or who have not lived in towns where Cheese of Butter Factories, are the immediate benefit of this industry to the community may have escaped your attention, and you may think there is not much to it. When you think of a cash return every week at a price of from \$1.2 to 2.12, cents per pound for milk, and multiply this by the amount of milk that 500 cows will give, you are going to have a weekly pay roll that will be surprising. If you have been skeptical, take your pencil and do a little simple arithmetic. It will surprise you.

A few cows have done more to stabilize agriculture in Canada than any other one item on the farm. True, there are reasons of low prices when the industry is not so inviting. But on the other hand, the value of milk, butter and cheese, remains constant whether prices are high or low, and in the long run, prices have a way of pretty well equalizing themselves, and the man who gets in and stays in, and we ought to emphasize STAYS IN, will always make out. If you are situated so you can produce a little milk for the factory, we throw out this challenge to you, to keep track of your income for a year from your cows, and unless your cows are all boarded up, and see if the net return is not away above what you figured on. We had a surprise, and we wouldn't have believed it if we hadn't actually seen the figures. We take our cheques, because they are small, and we keep no account of where they go, and we feel disgruntled and disappointed. We would keep track we would be surprised at how much the humble cow actually brings in, besides furnishing about half the family food. Try it and see if we are not Keerect.

Boost The Stampede

Make this Stampede the best of all. We can if we will. Ray, L. D. Loss, J. H. Walker, Andy Clark and hundreds of others in past years have worked hard to make the Raymond show more than a name. Let's not let them down. True, we are at war, but people need relaxation, and the proceeds from this show all go to the war effort. Be a Stampede fan and let's keep our show where it always has been right at the top in the Stampede circuit. Come, and bring your friends. More next week.

Miss Marjorie Gill and Bennett Rasmussen of Picture Butte were married at the Cardston Temple on Wednesday. Several of the young people from here, well acquainted with these young people were present to witness the ceremony.

Latest reports state that Ontario's expected 112,000 pounds of beet sugar for this year will not be any more than 32 p.c. of this amount at best. Weather and a decided labor shortage have combined to cause this loss.

No Coupons -- No Sugar

WILL COVER SIX MONTHS' NEEDS BUT CAN BE USED ANY TIME

(Lethbridge Herald)

Ottawa, June 17, Sugar ration coupons, unlike gasoline coupons, will not be dated or prescribed for use in any particular period, official sources indicated today. Under the sugar rationing system, however, users will be subject to the general regulations that no household is permitted to have all persons living at that address more than two weeks' supply of sugar. A decision must be stated and a decision hand, no to buy sugar when rationing must be signed that in possession of enough to last two weeks.

Subject to that rule, for a voluntary staff of 20,000, a branch of which penalties are women being organized under provided, people can use their ration coupons when and how they please. But once the quota is used up, no more sugar can be bought. The ration amount will be the same as the present allowance, half-pound per person per week beginning July 1st.

For the first ten weeks or so the new system will operate through temporary ration cards. After wards a coupon book will be issued sufficient for six months supply and no new coupon book will be issued until that period has expired. Special provision will be made for extra allowance for the canning and preserving seasons.

Next week postmen will deliver sugar ration application cards to every household. In all filling in the forms, names of all persons living at that address must be stated and a decision must be signed that in possession of enough to last two weeks.

Subject to that rule, for a voluntary staff of 20,000, a branch of which penalties are women being organized under provided, people can use their ration coupons when and how they please. But once the quota is used up, no more sugar can be bought. The ration amount will be the same as the present allowance, half-pound per person per week beginning July 1st. For the first ten weeks or so the new system will operate through temporary ration cards. After wards a coupon book will be issued sufficient for six months supply and no new coupon book will be issued until that period has expired. Special provision will be made for extra allowance for the canning and preserving seasons.

Cool Weather But Crops Growing

WEDDING BELLS

INNIS — MCBRIDE

At the Temple in Cardston on Wednesday Miss Zelma, daughter of Mr. and Mrs. Parley McBride, pioneers of Raymond and district, was united in marriage to Charles Frederick Innes of Stirling, with Pres. Edw. J. Wood officiating. Relatives and friends of both parties were present to wish them well and extend congratulations.

When they were ready to leave for home, friends had decorated the car with streamers, cans, old shoes, and a liberal supply of paint to give them a little extra advertising at no extra cost. They are living on the R.J. Fausett farm where the groom has been working for some years past. With their many friends we join in wishing them success and happiness in their journey through life.

Hon. Solon E. Low was a business visitor in Raymond for a few hours Thursday.

A.T.A. EXECUTIVE MEETING

Meeting of the executive of the St. Mary's Local A.T.A. held at Cardston Saturday June 13. Purpose of the meeting was to discuss progress of salary negotiations with the Divisional Board. Dr. Newland, in a recent radio address said, "Each teacher should be receiving \$2000."

The teachers of the St. Mary's River School Division are forthwith asking for a mere \$1000 basic salary.

One of the principal demands heard at the Alberta Teachers' Association convention in Calgary recently was that for higher salaries. The demand is pressing. That it should be granted is of interest not only to the teachers who would receive it, but to the province as a whole.

The task of shaping the attitudes, beliefs, characters and ambitions of children in schools too often is considered of secondary importance. How effective a particular kind of training can be has been strikingly illustrated by the Nazis. For years the ideals of totalitarianism have been installed in children until they believe them with fanatical zeal. Such training is distorted and not the kind we would want but it illustrates the point.

To expect this task to be performed for \$16.15 a week—that is how the \$840 minimum works out—is ridiculous. Allowing for holidays, the weekly salary would work out to something more than \$20. But during holidays, teachers especially those in the lower income brackets are expected to attend summer schools for refresher courses and new studies. This involves a big outlay, one which people with larger salaries would even consider. If teachers are to be enabled to keep abreast of developments they must get more money.

Rising salaries in war and other industries have attracted many teachers away from the profession. The situation has become so bad in Alberta that student teachers were sent out to fill the gaps. This year, normal schools will be opened early to speed the teacher output. There is no doubt that adequate salaries would help materially to maintain the supply of teachers.

St. Mary's A.T.A. Correspondent

Even with the excessive moisture and cool weather, crops and gardens are making steady growth and all look healthy. There has been a distinct advantage too in the weather remaining cool, had it turned off hot after these heavy rains the ground would have baked until growth would have been almost impossible.

Fields are nice and green and early seeded grains have stood nicely and stand from six to fifteen inches high. Winter wheat and rye are way up and commencing to head. On the ridge seeding has been held up due to rain, and it is likely that some intended wheat acreage there will be seeded to coarse grains, and work will have to be rushed at top speed if all of the intended acreage is seeded because of the lateness of the season. First cutting of alfalfa is just about ready and mowers are probably clicking in many fields as this is being written. Hay and grain should both make heavy crops this year with the moisture that has fallen, especially if we get a nice summer for growing and ripening.

Gardens are doing well, although in some low places seeds have rotted in the soil and re-seeding has been necessary. This however is the exception, rather than the rule. While somewhat slow and weedy, because of being unable to get on them because of the rain, gardens are growing nicely and look fine.

The incessant rains have brought their problems. Bishop Walker said he had worked one piece of land five times when the last storm came and it wasn't seeded then, so it means at least another working.

This plot should really be in good condition for a crop. The farmers on the ridge have spent about as much time going from their homes here to the farm and back again as they have spent on the land. About two days work between the storms was the average up to the time it rained after last week's storm. However, no one is complaining. We have never had too much rain yet, and as one party remarked we are just getting an answer to our prayers of the last fifteen years, so why complain when we get what we have asked for.

Our local troop of Air Cadets are planning now on spending a week in Summer Camp during July at the Airport in Medicine Hat. These boys have gone thru a heavy programme of work in the past five months or so under the direction of C.O. Kitchen and are looking forward eagerly to a week of training in an airport where they can enlarge their knowledge of the theory they have been studying here. More power to you boys.

FATHER'S DAY

Father's Day is Sunday, June 21st. We suggest that we give a thought to Dad on that Day. Without much glamor or to do, Dad just goes ahead three hundred and sixty-five days a year in his profession or his job, trying to see that the pantry is well stocked, that the coal bin is kept full, that taxes, phone and light bills are kept paid, that mother and the kids are provided with clothing and the essentials of life, and that the hundred and one chores around any home are taken care of.

Of course these things don't mean a great deal to any of us, only the ones who are fathers & have tried to carry on around the house dad is in the way except for lighting the fire, carrying out the ashes, keeping the washer, refrigerator, iron, toast

er etc, etc, running, fishing out the kale for son's night out and supposedly never being without a spare few dollars for exigencies that might arise and then when the unexpected happens in thunderstorm, blizzards, accidents or what not, we like to have the old man around. He seems to provide quite a tower of strength when our nerves start to fray and snap. Outside of these things we would not miss him much.

So, on Sunday, give a thought to Dad at least. With Mother he helps to mould your character. You unconsciously do the things and think the thoughts that Dad thinks. If he is cool, collected and wise in judgment, you will likely be the same way. If he is a leader in church or state, you will likely be because of your heritage. If he is a hero, you will likely be if the chance offers, because you have the ability in your blood, from Dad. If nothing more, grab his hand and tell him you appreciate what he has done and is doing for you, and on that day, you might take a little extra of his burden just to see how it feels. In our opinion he is almost as important in the household as Mother and is worthy of a little consideration and thought, and should be kept in good running condition.

WEEKLY LETTER

FERTILIZING TOMATOES

The early ripening of tomatoes in home or market gardens can be greatly encouraged by the proper use of commercial fertilizers. This is particularly important in seasons when tomato plants grow slowly because of wet and cool weather.

When fertilizing tomatoes with the idea of encouraging early fruit ripening it is essential that methods and materials are used which will act rapidly. For instance, the kind of fertilizer, the form in which it is applied, the method, time and frequency of application, are all important factors according to the results of experiments obtained at this Station.

The greatest success in encouraging tomatoes to ripen early has been obtained by applying fertilizer in liquid in-

stead of dry form. If dry fertilizer material is used time is lost while soil moisture is being absorbed to release the plant food even under irrigated conditions. However if the fertilizer is dissolved in water before it is applied the plant response is much more rapid. The practice followed at this Station is to dissolve one pound of fertilizer in a quantity of hot water. Then this solution is made up to a gallon with cold water. At each application one-quarter can of this solution is mixed with a quart of water for each plant.

The liquid fertilizer is applied in the field and is poured into saucer shaped depressions around the plants. Experience has shown that these depressions should be from 12 to 24 inches in diameter. If they are smaller the yield of early tomatoes is not as great.

The first application of the

SEEDTIME and HARVEST
By Dr. K. W. Neatby
Director, Agricultural Department
North-West Line Elevators Association
Emergency Change in Price Rates of Hog Grades

Like Easter bonnets, fashions in hogs change too. A little more weight and finish on the market hog is the order of the day. The recent announcement that the same price will be paid for B-3 hogs as lighter weights in the same grade category does not represent a radical change in the minds of Canadian Bacon Board officials. They have been urging heavier weights in order to make more certain that the 600,000 lb. British bacon contract will be fulfilled or exceeded. The change should be regarded as a temporary expedient rather than a permanent measure. The object is to get more pounds of bacon from the hogs marketed. Farmers are asked not to market a hog until it has reached at least 200 lbs. live weight. This should be good news for farmers. A little more finish can be put on their hogs with that extra barley they are planning to grow this year, without fear of a price discount on B-3 hogs weighing around 220 lbs. The change in price regulations does not apply to C-3 or D-3 grades.

There are six official carcass grades. These are "A," "B," "C," "D," "E" and Sows. "A" are carcasses from top quality bacon hogs. The remaining grades decrease progressively in general quality.

Grade	Carcass Weight Ranges		
	Class 1	Class 2	Class 3
	lbs.	lbs.	lbs.
"A"	140-170		
"B"	135-175	125-134	176-185
"C"	135-175	120-134	176-185
"D"	135-175	120-134	176-185
"E"	Includes—unfinished, oily, rejected, condemned, physically injured, stags or ridlings.		
Sows	Includes all females that have raised one or more litters.		

Page 59 of the Producers Grading Guide, published by The North-West Line Elevators Association, describes and indicates the weight ranges for the hog grades. If you should not have a copy of this booklet which, incidentally, outlines the official grade descriptions for all prairie farm products, your local line elevator grain buyer will gladly secure one for you. — Contributed by T. B. Pickersgill.

APPLICATION CARDS FOR COUPON RATIONING OF SUGAR

will be mailed next week
to every Household in Canada

Canadians will be required to register so that ration cards, good for the 10 week period, commencing July 1st, may be issued immediately. At the end of that period a coupon ration book, good for six months, will be issued.

HOW TO REGISTER

Residents in Urban Areas not served by Letter Carrier, and Residents in Rural Areas

Application cards will be distributed to all householders through the post offices on or before Tuesday, June 23rd. Additional cards will also be delivered for every person resident in the household, who bears a different last name from the head of the household. If needed, extra cards may be secured from local post offices.

These application cards should be filled out immediately and dropped in the nearest mail box or post office. A pamphlet giving complete instructions will be delivered with each card. As soon as your name is duly registered at headquarters, ration cards, good for a ten-week period, will be mailed to you—one ration card for each person in your home. These will be for sugar only.

Coupon Rationing for Sugar Becomes Effective July 1st

Beginning July 1st, no one will be permitted to buy sugar for regular domestic use without a ration coupon.

Prompt co-operation on the part of the public in filling out and returning their application cards is necessary to ensure return of the ration coupon card in time to purchase sugar on or after the above date.

Remember—the amount of sugar allowed each individual under the new coupon rationing plan will be exactly the same as allowed at present—1 pound per person per week.

NEWS NOTES

Miss June May is holidaying from the local Treasury branch and is visiting in Cardston this week.

The Stampede advertising is out now and two cars were out Tuesday putting up the big bills and distributing the programs. One bunch went to Warner, Coutts, across into northern Montana towns and home via Browning; another one went to Magrath, Cardston, Waterton, Park Pincher Creek, and down thru the Pass billing all those towns enroute. This promises to be the best Stampede yet.

Mr. and Mrs. O. H. Snow are expecting to leave the first part of July for an extended visit in Utah and Arizona with relatives and friends.

Mr. and Mrs. Geo. Court and Mr. and Mrs. J. Holland returned home early Friday morning after a week's trip into Saskatchewan, taking Ray Bascom home after a series of medical treatments here. They left in a rain storm and drove 322 miles to the ranch and it rained all the time. While in East End they attended a Stampede, with Mel Bascom as Arena Director, thru the Pass billing all those towns enroute. This promises to be the best Stampede yet.

According to radio announcement Wednesday night, gasoline coupons under Category A will be usable any time from now on, not in definite quarters according to the outline of the coupon book. This will have its conveniences and also its hazards. There's only so much gas to be bought with your coupons and a year is still twelve months, so don't tear 'em out too fast.

W. I. MEETING

The Raymond W. I. held their meeting on June 11 at the home of Mrs. Ira McBride with 14 ladies present. The meeting was opened by singing "O Canada" followed by the Pledge and the creed repeated. Roll call was answered by each one saying "What my holiday will be for the summer." Mrs. A. Rolfson led in singing "There'll Always be an England."

Mrs. Ann Turner gave a splendid paper on "Home Economics" followed by two solos by Mrs. Nita Mendenhall.

Plans were made for filling another Ditty Bag for the Navy Marines this summer. Mrs. Albert Winkler offered to make a leather jacket for the Marines.

Song by the McBride sisters. Lunch was served by the hostesses Mrs. McBride and Mrs. A. Rolfson.

Miss Wilma Sorenson has recently joined the staff in the local Treasury Branch as Stenographer. She commenced work last Saturday.

Heber Allen was a business visitor in Lethbridge on Tuesday.

The Stake Missionaries had charge of the meetings Sunday in Wrentham and Tyrell's Lake and along with some very good talks, rendered a musical program of violins, cello and piano which was very much appreciated by the audiences attending the meeting. They were at Wrentham in the morning and Tyrell's Lake in the afternoon.

JOHN BURKE-GAFFNEY

A young man who has deliberately set out to equip himself as a trained and experienced general practitioner of radio is John Burke-Gaffney, sound effects operator at CBC's Winnipeg studios.

John, as you might suspect, is of Irish origin, the son of parents who came from Dublin to Winnipeg nearly thirty years ago. He has all the brains, dramatic sense and quick wit of his Irish ancestors, and the pioneer ing West has endowed him with a capacity for hard work. At twenty he has already been labouring for more than two years at his chosen profession of radio, which he sees as an art and a science requiring dramatic ability, knowledge of music, and above all, technical training.

John first entered radio as an actor, on CBC cast under Producer Charles P. Wright. Sound effects interested him then, and so did the whole technique of radio broadcasting, with the result that presently he put acting aside and retired to St. Boniface Industrial School for a heavy course in radio physics. Completing this, he joined the staff of a Winnipeg station as a straight operator—good experience, which, however did not satisfy him. Summer relief as an announcer on another Winnipeg station followed, after which he joined the CBC Sound Effects Unit, a development of the Corporation's Engineering Department and the last word in radio technique. The programmes John works on in the Winnipeg studios can be heard over Station CBK Watrous (540 Kcs).

BREWERTON'S

BUY WINTER COAL NOW

Buy your winter coal now and avoid suffering later. This was the gist of a message issued by Premier Aberhart last week after he had received a communication from the Federal Coal Administrator. Heavy demands on labor and transportation next fall and winter will make hazardous the mining and delivering of coal, Mr. Aberhart said, and it is imperative that miners be kept busy now so as to avoid a threatened famine. Declaring that rationing may be necessary, the Premier said that it was understood the question of credit advances to the consumers was being considered by Ottawa authorities.

Declaring that although "many of our splendid miners had joined the fighting forces or had entered war industries" there were others still awaiting the reopening of the Alberta mines, Mr. Aberhart said. "If households will buy their coal now for next winter many of the mines will open up, production will proceed

Taber is voting this coming week on their Hospital plan. They propose to spend \$50,000 in the erection and equipping of a new hospital to serve them and their district.

The High School Year Book was out the first of the week, and should give graduating students something to remember the R.H.S. by. Printed on one side of the sheet only it is a good job of mimeographing, gives brief sketch of students and staff, and plenty of room in the back for autographs. Students should keep it for their memory album. They would really appreciate it twenty or twenty-five years hence when their own children were graduating. What a difference there will be in the realities of life when that many years have passed.

at full capacity and when winter comes they will be better prepared to meet the heavier demands particularly from the outside markets.
